Profile

Front-End Development Instructor with practical experience in building responsive and interactive web-applications using HTML, CSS, JavaScript and React.js. I have a strong foundation in modern front-end developement practices and specialize in creating intuitive, user-friendly interfaces.

Projects

Interactive Personal Portfolio Website | Link

Developed a fully responsive and interactive personal portfolio website using ReactJS, styled-components, and modern CSS. Showcased a collection of personal projects, technical skills, and professional experiences through a clean and interactive user interface. Key features include smooth scroll animations, a filterable project gallery, React Router-based navigation, and an **integrated contact form with form validation using EmailJS**. Followed a mobile-first design approach to ensure optimal performance across devices. **Utilized Git for version control and deployed the application via Render**, gaining hands-on experience in frontend deployment and component-based architecture. The project demonstrates my proficiency in ReactJS, responsive design, and modern front-end development.

VFX MILAN Portfolio Website | Link

Engineered a professional video editor portfolio website using React with TypeScript, emphasizing modular design, type safety, and maintainability.The platform highlights **Milan Dudkiya's** Video editing work through a visually compelling, high-performance interface with features such as embedded video previews and smooth transition using Framer Motion. Employed a responsive, mobile-first layout to ensure optimal viewing across all devices. Integrated a fully functional contact form using **EmailJS** to enable seamless client communication without backend infrastructure. Leveraged Git and GitHub for version control and deployed the site via Render, gaining hands-on experience with modern CI/CD workflows. This project showcases my ability to deliver creative, scalable, and production-ready web application using TypeScript and modern React.

Key Skills

Front-End: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind, TypeScript

APIs & Tools: REST APIs, Firebase (Basic), Git, GitHub, Jira, CI/CD

Testing: Chrome DevTools, Debugging

Responsive Design: Media Queries, Flexbox, Grid

Other: SQL, MySQL, MongoDB, Flutter (Basic)

Education

MSC (Computer Science) – Dhanaji Nana Mahavidyalya, Faizpur (2023– 25)

BSC (Computer Science) – Dhanaji Nana Mahavidyalya, Faizpur (2020– 23)

HSC (Science) - P.S.M.S School, Bamnod (2019-2020)

SSC - P.S.M.S School, Bamnod (2017-2018)

Declaration

I hereby declare that the above information is true to my knowledge.

Best Regards,
